

Experience Enterprise Agility and Beyond ...with Jile

From Doing Agile to Being Agile

Organizations continue to grapple with highly volatile market needs, accelerating time-to-market, realizing business outcomes, and delivering real customer value. Through Enterprise Agility, businesses can drive responsiveness, adapt to changing market needs by building a culture of rapid innovation, and align strategic decisions to business outcomes.

Jile and Enterprise Agility

Jile is a single Enterprise-class tool on the cloud to meet the large-scale development needs of multiple teams in distributed environments. It enables organizations to align strategy to team execution by providing a unified view from portfolios and programs to teams and helps business stakeholders and teams to collaborate effectively, thereby delivering valuable software faster to the market. Through its lean budgeting and allocation, Jile further helps the business stakeholders make wise investment decisions in response to business outcomes to achieve targeted goals.

Key Capabilities

Strategic Objectives, Key Results (OKRs), and Initiatives

Jile helps an organization to set goals in the form of objectives and key results. OKRs help in tracking business outcomes against the set goals.

Jile enables the organization to define strategic initiatives. These initiatives are further tracked to measure the success of teams in achieving the defined objectives.

Lean Portfolio Budgeting

With Jile, organizations can allocate budget at the portfolio level and distribute it across initiatives and programs under each portfolio.

Jile helps to track the allocated, available, and consumed budgets for the initiatives, helping you make strategic investment decisions.

Configurable Organizational Hierarchy

Jile helps to set up workspace using any popular scaling framework including organization hierarchy, choice of planning model (Scrum or Kanban) and configurable terminology. It allows setting up backlog into hierarchy of items. Teams can use configurable apps catalog to add any app, capability and reports based on needs of organization and teams.

Real-time Portfolio Rolled-up Views

Jile allows enterprises to track the progress of releases and iterations across multiple teams, products, value streams, and portfolios through customizable dashboards to get a rolled-up view.

Multi-level Planning

With Jile, a team can create hierarchical backlogs and prioritize them based on business needs. They are further planned into respective release and iteration schedules.

Jile offers a customizable Weighted Shortest Job First (WSJF) calculator to assign WSJF values to the backlog items. It also supports ranking based on WSJF values.

Contextual Collaboration

Jile has discussion boards at every entity level for distributed, dispersed, or remotely working teams to discuss and coordinate using threaded conversations. Teams can also track impediments that may pose challenges in meeting team commitments. Teams can manage documents, links, and references for each entity and set up event-based email notifications.

Continuous Deployment

Jile smoothens the release deployment process by providing out of the box plugins to popular automation tools. This pipeline can be either manually triggered or scheduled. Pipeline view helps to track the progress of the deployment process along with execution reports.

Test and Issue Management

Jile helps you build quality into every activity performed through defining and planning test cases, executing the tests, capturing defects and tracking its progress to closure.

Connect Seamlessly

Do you have a tooling structure for your team-level needs that cannot scale up or offer end-to-end visibility? Experience Enterprise scaling and a unified view from the portfolios and programs to teams in Jile. Use it with ease without bothering about the existing toolset.

Powerful Integrations

Jile leverages its partner network to provide seamless integrations to connect with your team-level tools that include Atlassian Jira, Service Now, CRM, ITSM, SAP and other ERP, PPM and PLM tools, providing a single source of truth for your data.

The Jile Advantage

Empowering Organizations to Innovate Faster Through Enterprise Agility

Align Business Strategy to Execution

Align strategic decisions to downstream execution through end-to-end traceability right from portfolios to teams.

Scale Up With Agile Frameworks

Choose from various scaling frameworks such as DA, LeSS, and more through configurable templates.

Inspect And Adapt As You Go

Learn and improve based on the performance at team and portfolio levels using real-time analytics.

Make Wise Investment Choices

Allocate budgets across strategic initiatives/programs and make funding decisions based on business outcomes.

Create Better Customer Value

Use measurable and reliable outcomes to deliver value faster to the customer.

About Jile

Jile is a single Enterprise-class tool on the cloud to meet large-scale development needs of multiple distributed teams. It enables organizations align strategy to team execution by providing a unified view from teams to programs and portfolios, helps business stakeholders and teams to collaborate effectively and thereby, deliver valuable software faster to the market.
